

BUILD PYTHON CODE

The screenshot shows a Google Colaboratory notebook interface. The browser tabs at the top include 'Welcome to P...', 'Dataset - Goo...', 'IBM-45745-16', 'Flask - Google', '(893) Ana...', 'Welcome To C...', 'Install Flask (L...', and 'Error 404 (Not...'. The address bar shows the URL 'colab.research.google.com/#scrollTo=3Uu-XpRqgTDK'. The notebook header displays 'Welcome To Colaboratory' with a 'Cannot save changes' warning. The left sidebar shows a file explorer with a folder named 'sample_data'. The main code area contains the following cells:

- Cell 1: `pip install flask`. The output shows that Flask and its dependencies are already installed in the environment.
- Cell 2: `from flask import Flask, render_template, request`
- Cell 3: `import os`
- Cell 4: `import numpy as np`
- Cell 5: `from tensorflow.keras.models import load_model`
- Cell 6: `from tensorflow.keras.preprocessing import image`
- Cell 7: `import requests`

The bottom status bar indicates '85.16 GB available' and the system time is '14:27 15-Nov-22'.
