

# TRAIN THE IBM MODEL

The screenshot shows the IBM Cloud Dashboard in a web browser. The browser's address bar displays 'cloud.ibm.com'. The dashboard header includes the IBM Cloud logo, a search bar, and navigation links for 'Catalog', 'Manage', and 'Sneha R's Account'. The main content area is titled 'Dashboard' and features a 'For you' section with several recommended actions:

- Build**: Explore IBM Cloud with this selection of easy starter tutorials and services.
- Build a web app with Watson Speech to Text**: Deploy a conversational interface compatible with any application, device, or channel. (Getting started, 15 min)
- Get Started with Watson Studio**: Get started with using AI and Cloud Object Storage in 15 minutes. (Popular, 2 hr)
- Build and deploy Node.js apps**: Go from zero to production in minutes with your Node.js applications, integrate with Watson and other services, scale your microservices. (Recommended, 15 min)
- Get started with Watson Discovery**: Get up to speed on Watson Discovery with step-by-step tutorials, deep-dive videos, and complete examples of working code. (Recommended, 2 hr)
- Build a Lift and Shift workload**: (Getting started)

Below the 'For you' section, there are links for 'User access', 'News', 'Planned maintenance', and 'View all'. The 'News' section highlights 'Introducing Badges to IBM Cloud Certification' and 'Announcing IBM SevOne Network Performance Management Version 6.4'.

The screenshot shows the IBM Cloud Catalog page for Watson Studio. The browser's address bar displays 'cloud.ibm.com/catalog/services/watson-studio'. The page header is consistent with the previous screenshot. The main content area is titled 'Select a location' and 'Select a pricing plan'.

**Select a location:** A dropdown menu shows 'Dallas (us-south)'.

**Select a pricing plan:** A table displays the available plans:

Plan	Features	Pricing
Lite	<ul style="list-style-type: none"><li>1 authorized user</li><li>10 capacity unit-hours monthly limit</li><li>Environment = # of capacity units required per hour</li><li>• 1 vCPU + 4 GB RAM = 0.5</li><li>• 2 vCPU + 8 GB RAM = 1</li><li>• 4 vCPU + 16 GB RAM = 2</li><li>• Decision Optimization + Watson NLP = Environment + 5</li></ul>	Free

Below the table, there is a note: 'The Lite plan for Watson Studio offers everything you need to become a better data scientist or domain expert in a collaborative environment. Lite plan services are deleted after 30 days of inactivity.'

**Summary:** The summary section shows 'Watson Studio' is 'Free'. It lists the location as 'Dallas', the plan as 'Lite', the service name as 'Watson Studio-y4', and the resource group as 'Default'.

**Existing Lite plan instance:** A warning message states: 'You can have only 1 Lite plan instance of this service per resource group. Delete your current Lite plan instance in Default resource group to create a new one, or view the existing instance.'

**License agreements:** A checkbox is checked, indicating 'I have read and agree to the following license agreements:'. A 'Create' button is visible at the bottom.

### Watson Studio in Cloud Pak for Data

Watson Studio is one of the core services in Cloud Pak for Data as a Service. Build, deploy and manage AI models, and optimize decisions on IBM Cloud Pak for Data.

Launch in IBM Cloud Pak for Data

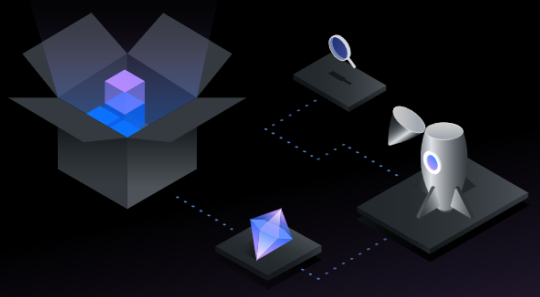

IBM Watson Studio is part of IBM Cloud Pak for Data and serves as the data science capability of the data fabric architecture.

## Preparing IBM Watson Studio

Loading User Information

Gathering account information from IBM Cloud.

IBM Watson Studio

Welcome, Sneha!

**Take a tutorial**  
Step through implementing a Data fabric use case in a sample project.

**Work with data**  
Create a project for your team to prepare data, find insights, or build models.

**Learn what's new**  
Stay current with new features, enhancements, and other changes.

**Quick start**

- Create data pipelines with DataStage
- Build customer profiles with IBM Match 360 with Watson
- Catalog and govern data with Watson Knowledge Catalog
- Build and manage ML models

**Projects**

Project Name	Last Modified
Sales Prediction using Weather Company Data	Nov 17, 2022 01:15 AM
Sales Prediction using Weather Company Data	Nov 16, 2022 10:15 AM

# Create a project

Choose whether to create an empty project or to preload your project with data and analytical assets. Add collaborators and data, and then choose the right tools to accomplish your goals. Add services as necessary.

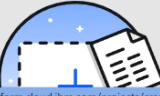

### Create an empty project

Add the data you want to prepare, analyze, or model. Choose tools based on how you want to work: write code, create a flow on a graphical canvas, or automatically build models.

**USE TO**

- Prepare and visualize data
- Analyze data in notebooks
- Train models

### Create a project from a sample or file

Get started fast by loading existing assets. Choose a project file from your system, or choose a curated sample project.

**USE TO**

- Learn by example
- Build on existing work
- Run tutorials

https://dataplatform.cloud.ibm.com/projects/create-project?context=cpdaas&type=import

Windows taskbar: Type here to search, Edge, File Explorer, Mail, Chrome. System tray: 7:48 PM, 11/19/2022.

Browser tabs: Rocket chat, PBLChat, IBM-EPBL/IB, IBM-EPBL/IB, IBM, Untitled Doc, Resource list, IBM Watson.

## Welcome, Sneh!

### Take a tutorial

Step through implementing a Data fabric use case in a sample project.

→

### Quick start

- Create data pipelines with DataStage
- Build customer profiles with IBM Match 360 with Watson
- Catalog and govern data with Watson Knowledge Catalog
- Build and manage ML models with Watson Studio

### Build and manage ML models with Watson Studio

Watson Studio is a service that you use to build, deploy, and manage AI models and to optimize decisions.

Work within a project to build models. Customize how you work by choosing from notebooks, graphical canvases, and no-code tools.

Cancel | **Next**

### Get started

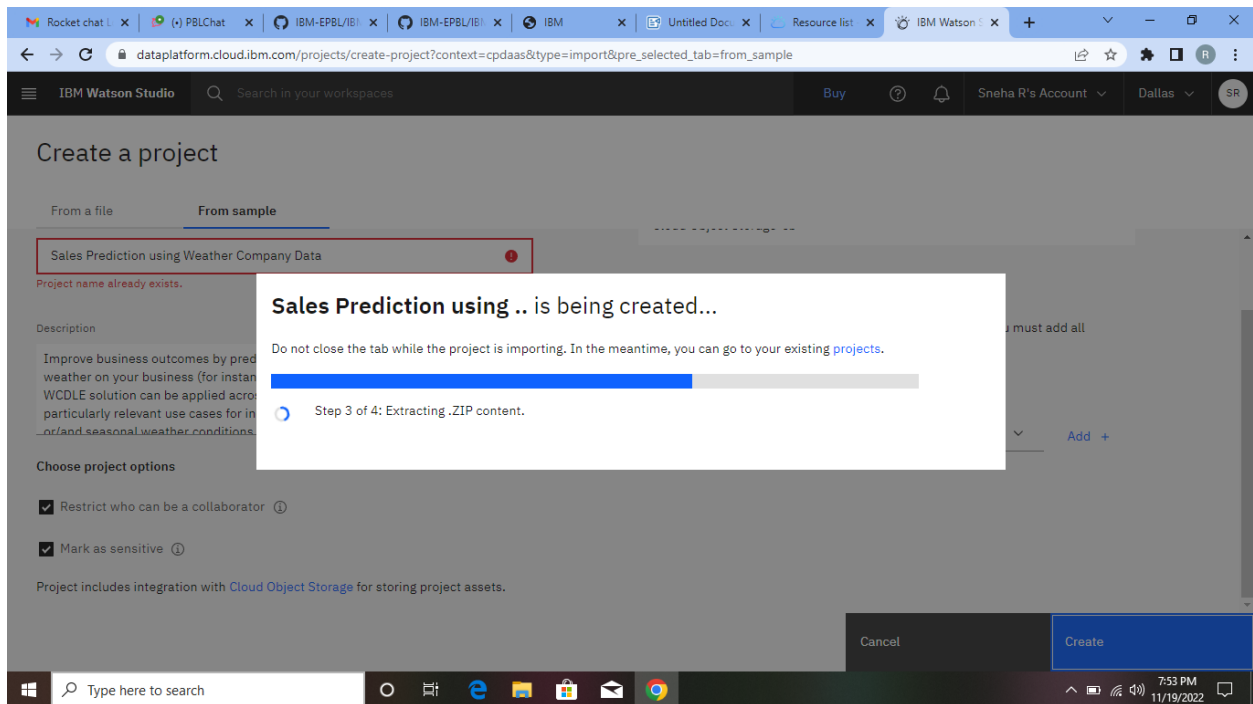

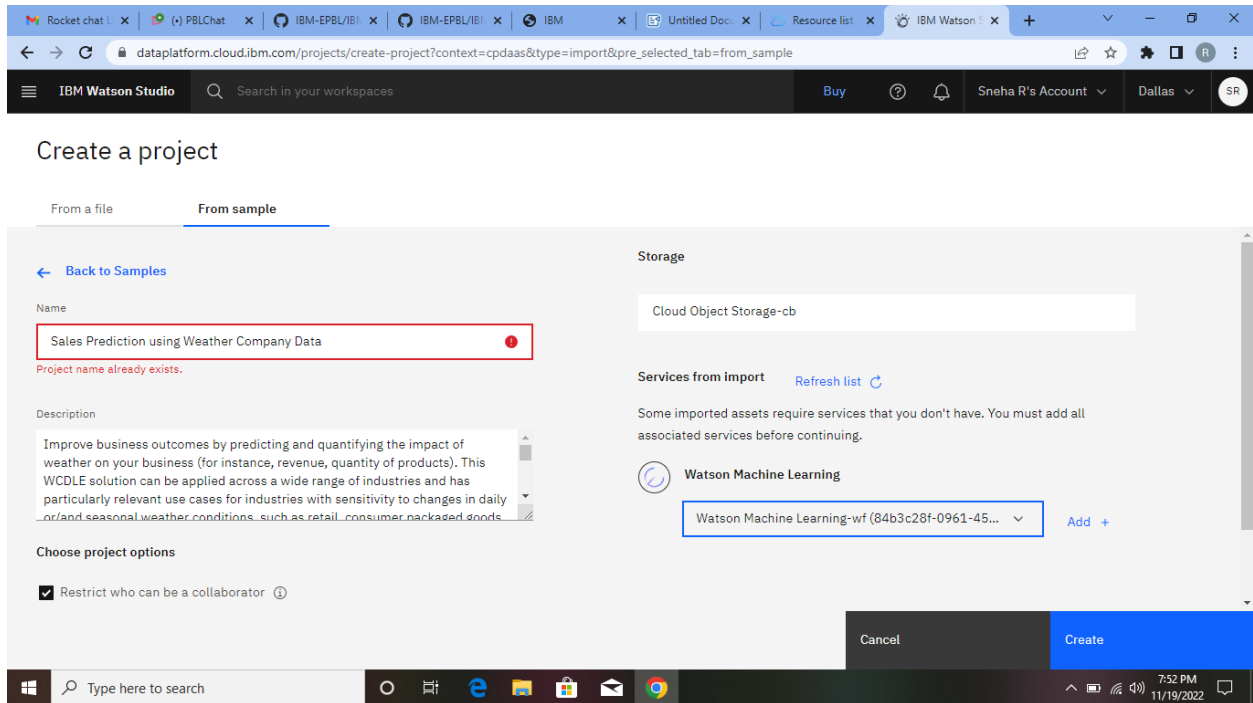

- Sample project**  
Open a sample project with pre-built Watson Studio assets.
- New project**  
Create a project and then add your own data to get started.

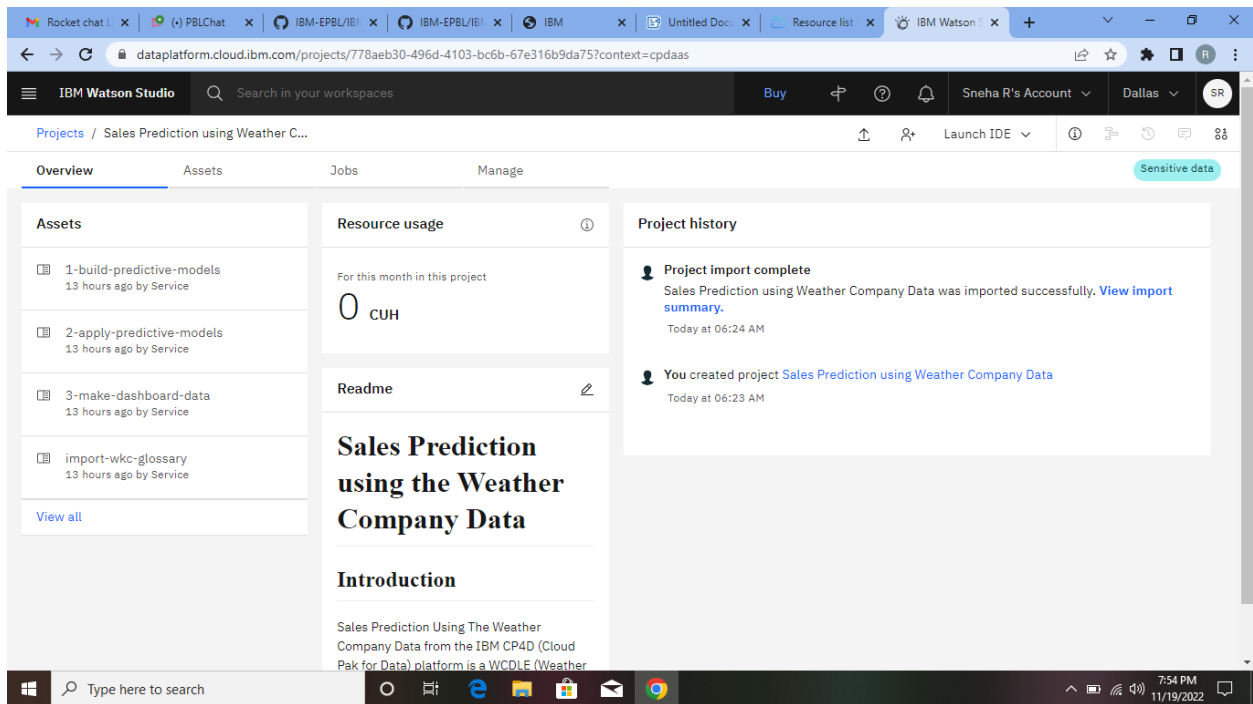

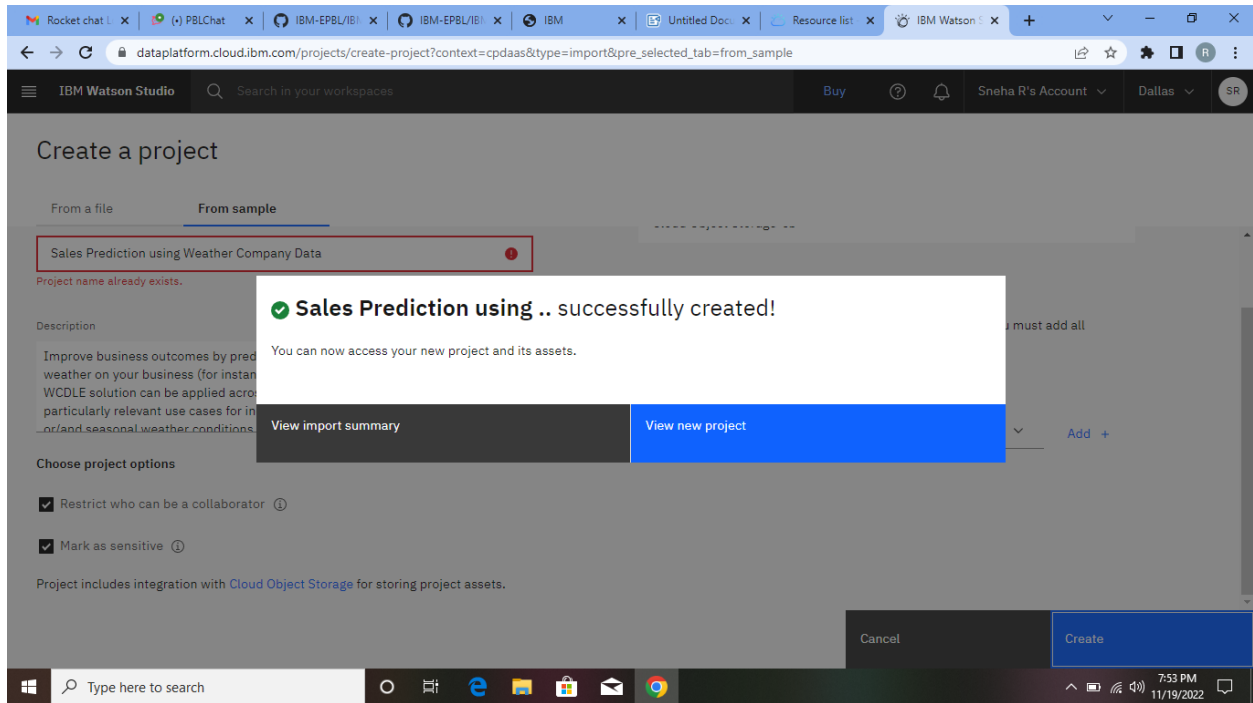

### Deployments

① No deployment spaces  
After you create spaces, you'll see them here.

New deployment space +

Windows taskbar: Type here to search, Edge, File Explorer, Mail, Chrome. System tray: 7:50 PM, 11/19/2022.

IBM Watson Studio interface showing the Assets page for a project named "Sales Prediction using Weather C...". The page displays a list of 16 assets, including notebooks and data files, all modified 14 hours ago. The assets are listed in a table with columns for Name and Last modified. The assets include:

- 1-build-predictive-models (Notebook from local system)
- 2-apply-predictive-models (Notebook from local system)
- 3-make-dashboard-data (Notebook from local system)
- import-wkc-glossary (Notebook from local system)
- sales-prediction-using-the-weather-company-data-glossary-ter... (CSV)
- weatherdataSchema.png (PNG)
- sales-prediction-using-the-weather-company-data-glossary-cat...

The interface also shows a sidebar with "Asset types" (Data: 12, Notebooks: 4) and a "Find assets" search bar. A tooltip indicates the date "Sat, Nov 19, 2022 06:24 AM".

IBM Watson Studio interface showing the Notebook page for a project named "Sales Prediction using Weather C...". The notebook is titled "Step 0.1: Configure the Analysis: Import Software Packages, Set Parameters and Define Custom Functions". The notebook content includes the following code cells:

```
In [3]: config="config.py"
f = open(config, 'w+b')
f.write(project.get_file(config).getbuffer())
f.close()

In [4]: config2="config2.py"
f = open(config2, 'w+b')
f.write(project.get_file(config2).getbuffer())
f.close()

In [5]: # -----
# LOAD ANALYSIS CONFIGURATION
# -----

# import configuration information from the config script files stored under the Data Assets section.
import sys
from config import *
import random
import string

loadfile1="fauxsales1.csv"
loadfile2="fauxweather1.csv"

# notify scientist: completed analyses
print("DONE: 'STEP 0.1: Configure Analysis' analysis")
```

The notebook output shows "DONE: 'STEP 0.1a: Import Software Packages' analysis".

Windows taskbar showing search bar, taskbar icons (File Explorer, Edge, etc.), and system tray (clock, network, volume).
